I am a farmer/rancher and have business interest outside the Ag community, I wish to applaud WAPA and US Fish & Wildlife for their efforts to streamline the approval process for wind projects in the upper midwest. PEIS should help speed up the wind projects to produce the electricity that this nation needs to grow. I know that migratory birds may be affected by the construction of wind projects, especially along the missouri river corridor. But this is also some of the prime wind resource area in the US. I would hope we could find a compromise that would allow wind projects and protect the wild life as well.

Thank you

Charlie Boe
